## Summary

Computer Science student at York University with hands-on experience in full-stack development, cloud infrastructure, and AI-integrated applications. Proven ability to deploy containerised services in enterprise Azure environments and ship production-ready web applications end-to-end.

## Education

### York University

*Bachelor of Science (Honours) in Computer Science*

Sep. 2024 – Present

Toronto, Canada

### Emirates International School

*IB (International Baccalaureate) Diploma Programme*

Sep. 2022 – May 2024

Dubai, UAE

- Subjects: Mathematics SL, Physics SL, Chemistry HL, Business HL, English HL, French SL

## Experience

### United Technology Holdings

*Technology Intern*

Jul. 2025 – Aug. 2025

Dubai, UAE

- Deployed and configured containerised services using Docker within a Microsoft Azure enterprise environment, working in a Linux-based deployment workflow alongside the infrastructure team.
- Conducted infrastructure security reviews by auditing network access controls and documenting findings across internal data systems, identifying gaps in access policy documentation.
- Used Git-based version control to manage configuration changes and collaborate with engineers on shared deployment scripts.

### Al-Habtoor Group

*Technology & Operations Intern*

Dec. 2022

Dubai, UAE

- Supported the IT department in preparing 3D modelling and data visualisation assets for real estate project presentations delivered to senior stakeholders.

### Eagle Hills Real Estate

*Business Operations Intern*

Dec. 2022

Dubai, UAE

- Rotated through Finance, Audit, HR, Marketing, Legal, and IT departments, gaining exposure to financial reporting workflows on multi-million dollar real estate development projects.

## Projects

### CashTrackr AI | TypeScript, React, Tailwind CSS, Node.js, Express, PostgreSQL, Gemini API

May 2026

- Built a full-stack personal finance web application with a React + Vite + TypeScript frontend (Tailwind CSS, React Router) and a Node.js/Express backend connected to a PostgreSQL database via the Prisma ORM.
- Modelled relational data (users, expenses, categories) using the Prisma schema and queried it from the Express backend to power dashboard views, expense CRUD, and per-user data isolation.
- Integrated the Google Generative AI SDK to suggest expense category groupings, with a preview-and-apply workflow so users can review AI suggestions before changes are saved.
- Designed and implemented a fintech-style dark/light mode UI in Tailwind CSS based on a custom Figma prototype.

### Portfolio Website | HTML, CSS, JavaScript

2025

- Designed and deployed a personal portfolio site showcasing projects, technical skills, and internship experience with a responsive mobile-first layout.
- Optimised for performance and accessibility, achieving fast load times through minimised assets and semantic HTML structure.

## Technical Skills

**Languages:** Python, Java, C, JavaScript, TypeScript, HTML/CSS, SQL

**Frameworks & Libraries:** React, Node.js, Express, Tailwind CSS, JUnit

**Cloud & DevOps:** Microsoft Azure, Docker, Google Cloud Platform, Linux, Jenkins, GitHub

**Databases & Tools:** PostgreSQL, VS Code, Android Studio, WordPress, Figma
